

Showcase

Site of the Day

30 Days Of Fashion

Get in on the glam that is the New York fashion scene with this interactive website showcasing fashion events in the Big Apple this month. The site features an XML driven calendar, a Fashion Closet that highlights a different product giveaway each day, a daily blog, videos, and audio, all delivered through a Flash front end. Developer Siite Interactive also used After Effects, Photoshop, and Illustrator to build the site. (Sep. 21, 2006)
